

Eclipse has unique CrystaLock Technology

to absorb exudate and lock it in

- Absorbs exudate and locks it within the dressing
- Prevents leakage, which helps prevent maceration
- Locks away bacteria, therefore reducing risk of infections
- Locks away excess MMPs which cause and prolong chronicity

Exudate management is the key priority when managing highly exuding wounds.

ADVANCIS

Eclipse

Super absorbent dressings

Treat with confidence

- Highly absorbent
- Use safely under compression
- Zero strikethrough
- With shapes and sizes to suit every patient

www.advancis.co.uk

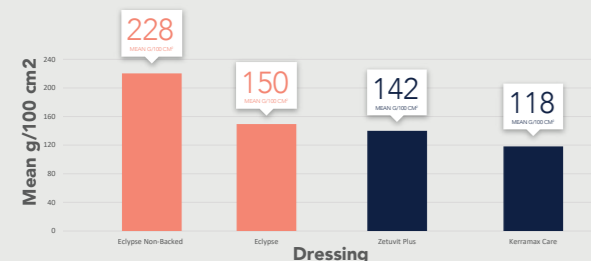

Why choose Eclypse with CrystaLock Technology?

Absorbency • Comfort • Confidence

Eclypse is highly absorbent^{1, 2}

Absorbency influences change frequency, risk of maceration and risk of strikethrough.

Eclypse is highly absorbent vs alternatives

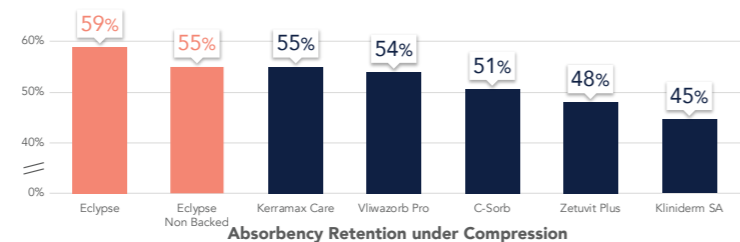

Eclypse is comfortable³

4+ rating on a scale of 1-5 for comfort during use and at dressing change.

Eclypse is the Superabsorber least affected by the pressure exerted by compression^{2,4}

Eclypse retains absorbency capacity under compression

Eclypse does not affect compression sub-bandage pressure⁵

Mean percentage increase in sub-bandage pressure using 2-layer compression kits

Mean percentage increase in sub-bandage pressure using 4-layer compression

Saves up to **50%** Compared to Kerramax 20x22cm*

*Drug Tariff pricing July 2024

The choice is clear. There's an Eclypse Superabsorber to suit all your needs.

Looking for high absorbency with zero strikethrough?

Look no further than Eclypse

- Highly absorbent moisture locking system.
- + Zero strikethrough backing to improve patient quality of life and prolonging wearability.

Looking for Maximum absorbency?

Look no further than Eclypse Non-Backed

- Double Crystallock Technology layer for best-ever absorbency.
- Increased absorbency reduces need for stacking.

And an **unparalleled range** and unique shapes and sizes...

Eclypse manages exudate to allow healing

Patient Profile

Patient
63 year old male

Wound
Leg ulcer present for 2 months
Highly exuding

Previous Treatment
Daily dressing change with non-adherent pad

Treatment Aim
Use of **Eclypse** to manage exudate to allow healing

Results
Due to effective exudate management dressing changes reduced:

- Twice a week after 1 week
- Once a week after 2 weeks
- At 4 weeks only a small area of ulceration remained

Presentation

Week 4

Eclypse Boot is effective on excessively leaking oedema

Patient Profile

Patient
Male with history of hypertension, diabetes, obesity and myocardial infarction

Wound
Excessively leaking bilateral oedema
Admitted to hospital

Previous Treatment
Frequent visits per day for exudate management

Treatment Aim
Use of **Eclypse Boot** and **Eclypse** to manage leakage and reduce nurse visits

Results
By day 5 the patients' legs were dry and no longer required any dressings.

Admittance to hospital

Day 5
